

Service and Repair Center

Alice, Texas

Bringing Service and Repair to You

Our support for your operations goes beyond supplying equipment. By providing local service and repair through our aftermarket facilities, we help maintain your equipment and assist your crew.

Our facility in Alice, Texas is ready to quickly provide the local repair and service you need to help you thrive. This facility is strategically located to help reduce downtime and shorten response times. Easy access geographically, a vast supply of spare parts and service options, and skilled in-house and mobile technicians ensure we are prepared to keep your equipment running efficiently so you can maximize uptime.

In-house Service and Repair

- Disassembly, inspection, rebuild and testing of NOV Iron Roughnecks, Accumulators, BOPs, HPUs and some TDS-11 assemblies
- Future Upgrades: additional repair bays with two Iron Roughneck sockets, Top Drive repair bay, BOP pressure test bay including ability to test Shaffer and T3 BOPs
- TDS and Iron Roughneck component rebuild and shipment back to you as ready spares

Inspections to Improve Equipment Life and Detect Problems Early

- TDS-11 Annual Inspections: field service technicians complete 95%

of annual inspection in-house and the remainder on-site with an End-Play Measurement and Operation Test when TDS-11 is rigged back up vertically in the mast. If five year inspection is required, TDS-11 is shipped to Houston repair facility

- TDS-11 Three or Six Month Inspection: gearbox, motor insulation/greasing, alarm interlocks, operation check, oil check, TDS greasing, overall wear/damaged part check. In-house or on-location.
- TDS-11 Rig Move Inspections: motor insulation, alarm interlocks, operating check, overall wear/damaged part check. In-house or on-location during moves.

- ST-80 Inspections and Crew Training: HPU, gear box oil change, proper greasing check, overall wear/damaged part check. We also can train your crew on proper operation and maintenance.

Facility Features

- Expanding warehouse with full line of spare parts to support the NOV TDS-11 Top Drives, ST-80 and IR3080 Iron Roughnecks, Shaffer and T3 BOPs, HP-35 and HP-75 HPUs and Accumulators; can also stock specific parts at customers' request
- After hours parts support: 361-396-2734

Mobile Support - FAST Solutions

- 24/7 on-call service technicians who quickly deploy to operating rig sites to troubleshoot or make repairs
- Service trucks stocked with TDS-11, ST-80, EDS and Amphion™ OEM replacement parts, tools, filters and consumables for quick access and service

Field Service

- On-site troubleshooting/repair of NOV equipment, and training in operation and maintenance
- Can create inspection system for various equipment to meet your needs
